(54) ACCESS METHOD FOR COMPUTER RESOURCE, AND SECURITY COMPUTER

(57)Abstract:

PROBLEM TO BE SOLVED: To provide high-level security by information stored in a large-capacity data base and a repository.

SOLUTION: Key codes(KG) are assigned to users 12, 15 and 18 of the repository 3, which includes a resource 8 such as a program and data to which key code is assigned. The key code of the resource 8 includes characteristics of users needed to access the resource and conditions under which access is allowed. When a user makes a request to access the resource 8, a security process 5T inquires whether the user meets the conditions prescribed with the key code of the resource.

**LEGAL STATUS**

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
